3. **Essays** need an introduction with a clear thesis, 3–4 body paragraphs (theory → link → case study evidence) and a conclusion that answers the question.
4. The answer booklet has the official marking guidelines for each question plus a model response written in the structure from your notes (using Qantas as the case study) – except where the official guidelines already include a full exemplar response.

Fly Well Airlines Ltd is a low-cost Australian based domestic airline that has been exploring options to expand globally. Its domestic customers in Australia typically tend to be business executives and budget conscious leisure travellers.

The business intends to begin operating flights into the highly competitive Asian market in the latter part of 2023. To achieve this, the business will have to fund the purchase of new computerised ticketing and baggage facilities at its Sydney terminal. Management believes there is also opportunity for the airline to move all scheduled aircraft servicing and maintenance to a contractor in Singapore. Employees who belong to unions have indicated they will respond to this with industrial action. Management is also concerned about the best way to achieve a sustainable competitive advantage in their new overseas markets.

You have been hired as a consultant to write a report for Fly Well Airlines Ltd.

In your report:

- Outline ONE advantage and ONE disadvantage of outsourcing aircraft servicing and maintenance.
- Discuss issues involved in raising funds through both debt and equity finance and make a recommendation to management about which source of funding to use.
